

LED Load Resistor

#QVLR

www.qvee.com.au

DESCRIPTION

LED lamps have a very low current draw and this can often lead to problems with flasher units causing the indicators to flash quickly.

These LED load resistors are designed to eliminate the problems caused when an LED lamp is used to replace a globe type lamp.

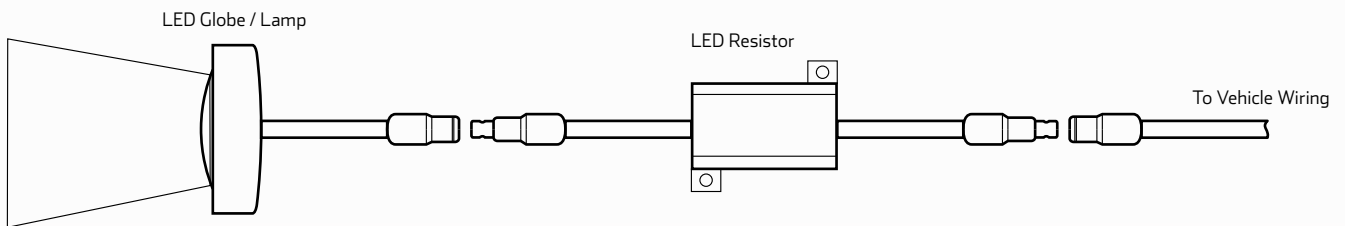

FEATURES

- Ready to use, simply connect wiring through the provided plugs.
- Supplied with mounting screws
- Suitable for most LED globe applications

COMPRISES

- 1x LED load resistor
- 1x Pre-wired connector
- 1x Mounting screws set

WIRING DIAGRAM

Globe and female wiring harness not included

TECHNICAL SPECIFICATIONS

Part Number.	Voltage	Wattage	Resistance	Descriptions
QVLR12	12 Volt	30 Watts	12 Ohms	12 Volt / 30 Watt LED load resistor with pre-wired connectors
QVLR24	24 Volt	30 Watts	36 Ohms	24 Volt / 30 Watt LED load resistor with pre-wired connectors
